● **Course Overview**

This course provides an insight into advanced-level database management through Microsoft Excel, which is typically used to analyse, explore, and present visualisations of data. It helps to use advanced formulas and functions and enables learners to generate advanced Excel skills, which are necessary for computing and analysing data. This course offers a comprehensive introduction to creating and customising Google Maps, emphasising the essential concepts of Web GIS (Geographic Information Systems). Participants will learn to integrate geographic data, design interactive maps, and apply Web GIS principles to real-world applications. The brief knowledge of MS Excel will help us handle large amounts of data within a fraction of a second.

In recent times, it has become an inevitable tool and plays a vital role in higher education. There is no doubt that in this modern era, everyone needs a search engine like Google, etc. for their queries, problems, or doubts.

So, this add-on course will be very effective for our students from different branches.

● **Course Objectives**

- Editing a chart
- Using a Chart in a Word Document
- Colouring a Chart
- Types of Charts: 2D Chart, 3D Chart
- Inserting a Chart, Image, and Graph
- Data Analysis Using Charts and Graphs

❖ **Module 4 (2 hours):**

- Headers, inclusion of text, numbers, and other content that displays at the top
- Using Headers and Footers

❖ **Module 5 (6 hours):**

- World Wide Web
- Search engine, URLs
- Electronic mail and emails
- Mail Merged
- Creation of Google Maps

❖ **Module 6 (2 hours):**

- Google Form
- Google Classroom
- Using a Spread Sheet

❖ **Module 7 (2 hours):**

- Advance Statistical Analysis using Advanced Excel Operation

● **Assessment / Examination (F.M. 50)**

- Step 1 – Written Examination (25)
- Step 2 – Presentation/ Practical (15)
- Step 3 – Viva-voce conducted by the college (10)

● **Certification**

After passing all the examinations listed above a student will be given a certificate from Sonamukhi College.

By
Department of Mathematics
Sonamukhi College

Course Coordinator Advisory Board
Dr. Asit Dey Dr. Subhendu Ruidas
Assistant Professor of Mathematics
Sonamukhi College

Salient Features

- Course duration : 32 hours
- Eligibility: All UG students from the faculty of Science (Sem-III & Sem-V)
- Course Registration Fee: Rs.50/-
- Prerequisite: Knowledge of basic Mathematics of 10+2 level
- Teaching Mode: Hybrid mode of teaching

Curriculum & Outline of the Course

- Understanding the working environment and basic syntax of Mathematica
- Exploring the built-in functions in Mathematica and the process of defining user-defined functions
- Understanding the logical & conditional statements, looping structures, nested compound statements and learning multi-dimensional arrays.
- Applications in various numerical methods including solution of algebraic and transcendental equations, numerical differentiation and integration, solving differential equations, finding eigen values and eigen vectors, etc.
- Basic graph plotting, surface plotting, contour plotting, graphics enhancement, etc.

Outcome of the Course

- Execute Mathematica commands and functions for various computations
- Construct interactive demonstrations using Mathematica's dynamic capabilities
- Plot different functions and data files in two & three dimension
- Learn numerical computation of solutions to mathematical and applied problems

Add On Course:

Learning Mathematica for Scientific Computing

Course Objectives:

Mathematica is a mathematical program used in many scientific, engineering, mathematical, computing fields and applies intelligent automation in every part of the system, from algorithm selection to plot layout and user interface design.

Studying *Mathematica* serves several important purposes such as an interactive classroom experience that helps students learn concepts, and gives faculty tools to create course materials, a single workflow that keeps all elements of a project together in flexible documents, a wide range of applications, including in the humanities, business, and machine learning. Also, *Mathematica's* strengths include Symbolic computation and numerical methods, functional and rule-based programming, a large library of functions, well-written documentation, and a notebook environment.

Curriculum & Outline of the Course:

The basic architecture of the course is the following.

Module 1 (Teaching: 3 hours, Practical: 1 hour)

Understanding the *Mathematica* environment and syntax

- Overview of *Mathematica*.
- Navigating the *Mathematica* environment.
- Basics of *Mathematica* syntax.
- Simple commands and introduction to the notebook interface.
- Basic arithmetic and algebraic computations.

Module 2 (Teaching: 5 hours, Practical: 2 hour)

Introduction to variables and functions

- Variables name and global variables.

SONAMUKHI COLLEGE
Department of Mathematics
Sonamukhi, Bankura
Ajit Dey
7/9/24

Principal
Sonamukhi College

- Defining functions and procedures
- Introduction to *Mathematica*'s built-in functions.
- Exploring mathematical functions and their properties.
- Conditional expressions and pattern matching.
- Loops and iteration methods (for, while, do).

Tutorial & Doubt Clearing Session (1 hour)

Module 3 (Teaching: 6 hours, Practical: 4 hour)

Numerical Calculations

- Repetitive operations and conditional operations.
- Differentiation and integration.
- Solving algebraic and transcendental equations.
- Solving differential equations.
- Basic results on matrices and finding of eigen values and eigen vectors of a given matrix.

Module 4 (Teaching: 3 hours, Practical: 3 hours)

Introduction to Graphics

- Plotting functions and data in 2D.
- Surface plotting
- Customizing plots (labels, legends, colours).
- Contour and density plots.
- Basic graphics enhancement.
- Introduction to geometric computations and graphics.

Tutorial & Doubt Clearing Session (1 hour)

Assessment Test (3 hours)

Suggested Readings:

- Stephen Wolfram, "An Elementary Introduction to the Wolfram Language", 2015, Wolfram Media.
- Cliff Hastings, Kelvin Mischo, Michael Morrison, "Hands-On Start to Wolfram Mathematica and Programming with the Wolfram Language", 2nd Edition, 2015, Wolfram Media.

Course Outcome:

Students succeeding in this course will be able to:

- Execute *Mathematica* commands and functions for various computations.
- Manipulate and analyse data using *Mathematica*.
- Construct interactive demonstrations using *Mathematica*'s dynamic capabilities.
- Plot different functions and data files in dimension two & three.
- Learn numerical computation of solutions to mathematical and applied problems.

Policies:

Examination (F.M. - 50)

Step1 – Internal Assessment (10)

Step1 – Written Examination (25)

Step 2 – Practical Examination (15)

Certification

All the participants will be provided a certificate from Sonamukhi College after successful completion of the course.

Plant Propagation

About the Course	Target Students:	Program plan
<p>Topics like Horticulture, Gardening, Plant propagation are some important field in botany. All these topics are in different way associated with in curriculum of BKU Botany syllabus. The objective of the program is to enhance the skill of students on different aspects of plant propagation specially in vegetative propagation by budding, cutting, layering etc. With this knowledge students will be able to covert there surrounding an eco-friendly beautiful green environment. This program will also help students to become expert on different techniques of plat propagation and this skill surely help them to become self-employed.</p>	<p>Students of SEM III and V, especially Biological Science students of Sonamukhi College</p>	<p>September, 2024: Unit 1 & 2 and Field work Sl.no. 2 & 3</p> <p>October, 2024: Unit 3 and Field work Sl.no. 4, 5 & 6</p> <p>November, 2024: Unit 4 and Field work Sl.no. 7 & 8</p> <p>December, 2024: Unit 5, Laboratory work Sl.no. 1 and evaluation</p>

Course Objectives:

- 1) To developed a clear knowledge about reproductive system of plants.
- 2) To make participant skillful about clone preparation of plants.
- 3) To maintain valuable plants for long period of time.
- 4) To bring and propagate rare plants in new area.
- 5) To make the participants self-independent.
- 6) To make an eco-friendly environment by plant propagation scientifically.

Course Learning Outcomes:

On completion of this course, students will be able to

- 1) Develop a clear knowledge about reproductive system of plants.
- 2) Achieve a clear knowledge about different procedure of propagation depending on types of plant.
- 3) Develop a skillful expert on plant clone preparation.
- 4) Become self-independent.
- 5) Bring and propagate rare plants in new area.
- 6) Make an eco-friendly environment by plant propagation scientifically.

Curriculum for Add-on Course

SYLLABUS

Academic Session: 2024-25

Course Title: Plant Propagation

Duration: 36h

(Theory: 20h & Practical: 16h)

Theory

Unit 1: (2h)

Reproductive system: Mode of Reproduction: Vegetative, Apomixis and Sexual

Unit 2: (4h)

Seed: Definition, Structure and types - Seed dormancy; causes and methods of breaking dormancy; Seed storage: Seed banks, factors affecting seed viability, seed testing, Germination-Process and types, factors affecting germination.

Unit 3: (8h)

Vegetative Propagation: Cutting: Root Cutting, Stem Cutting, Leaf Cutting and Leaf Bud Cutting; Advantages

Layering: Ground layering-Tip layering, Simple layering, Compound

layering, French layering, Mound layering. Air layering. Advantages of layering

Budding- T budding, patch budding, chip budding, flap budding, ring budding, flute budding; Advantages of budding.

Grafting or graftage: Methods- Approach or inarching, whip, cleft, Top, Veneer, Epicotyl & Bud Grafting or Budding. Advantages of grafting.

Unit 4: (3h)

Preparation of seed bed, sowing of seeds and raising of seedlings.
Transplantation

Unit 5: (3h)

Plant Propagation by tissue culture: media, totipotency, explant, callus formation, Artificial seed. Micropropagation and its application.

Practical & Field Work: (8x2=16h)

1. Seed viability and Germination Test.
2. Propagation by Cutting.
3. Propagation by Ground Layering.
4. Propagation by Air Layering.
5. Propagation by Budding.
6. Propagation by Grafting.
7. Preparation of Seed Bed.
8. Transplantation Process.
