7.1.4 About Rain Water Harvesting and Bore Well Recharge

Rain water harvesting is not set up neither by any external agency nor by any external expert. It was installed in 2016 after consultation with teachers of Geography Department.

Roof Top water is immersed in water recharge point which is near to Open Well and Bore Well. Roof top water is also harvested in water harvesting tank situated within medicinal garden. Water mainly use to irrigate medicinal plants specially in summer season. Geo- tagging photos have been attached herewith.
